

# Test Case Generation - Getting Started

## Requirements

The infrastructure you need to run the test case generator is:

- Java 8 JDK
- Groove-test-generaiton.bat file

## User Interface

## Generating Test Suite

- After performing the requirements, you can run the test case generator by selecting the “Test Case Generation (Integration)” submenu from Test menu.
- In the displayed window, specify the setting parameters and then press the “Start” button.
- During test suite generation, the “Console” panel displays some valuable outputs of the running process.
- At the end of the operation, the “Result” panel shows the result of the statistical analysis as well as the generated test suite.
